

ALA-13 Pavement Preservation Project Fact Sheet

PROJECT LOCATION

The project is located on Route 13 in Alameda County in the city of Oakland from I-580 to Route 24.

PROJECT SCOPE

This project is needed to extend the life of the existing pavement. The work for both northbound and southbound includes:

- Cold plane existing pavement (grind surface of pavement in preparation for re-surfacing), including shoulder areas
- Overlay with Rubberized Hot Mix Asphalt
- Minor digouts
- Replace affected loop detectors and traffic stripes

This work will require partial closure of the freeway lanes and full closure of the on/off ramps and freeway connectors within the project limits. Detours will be provided. Work will mostly occur at night to reduce impacts to traffic.

CONSTRUCTION SCHEDULE (Tentative)

Construction begins: April 2016

Construction complete: July 2016

PROJECT COST: \$4.5 million
